

Executive Context

Margin pressure persists across the portfolio

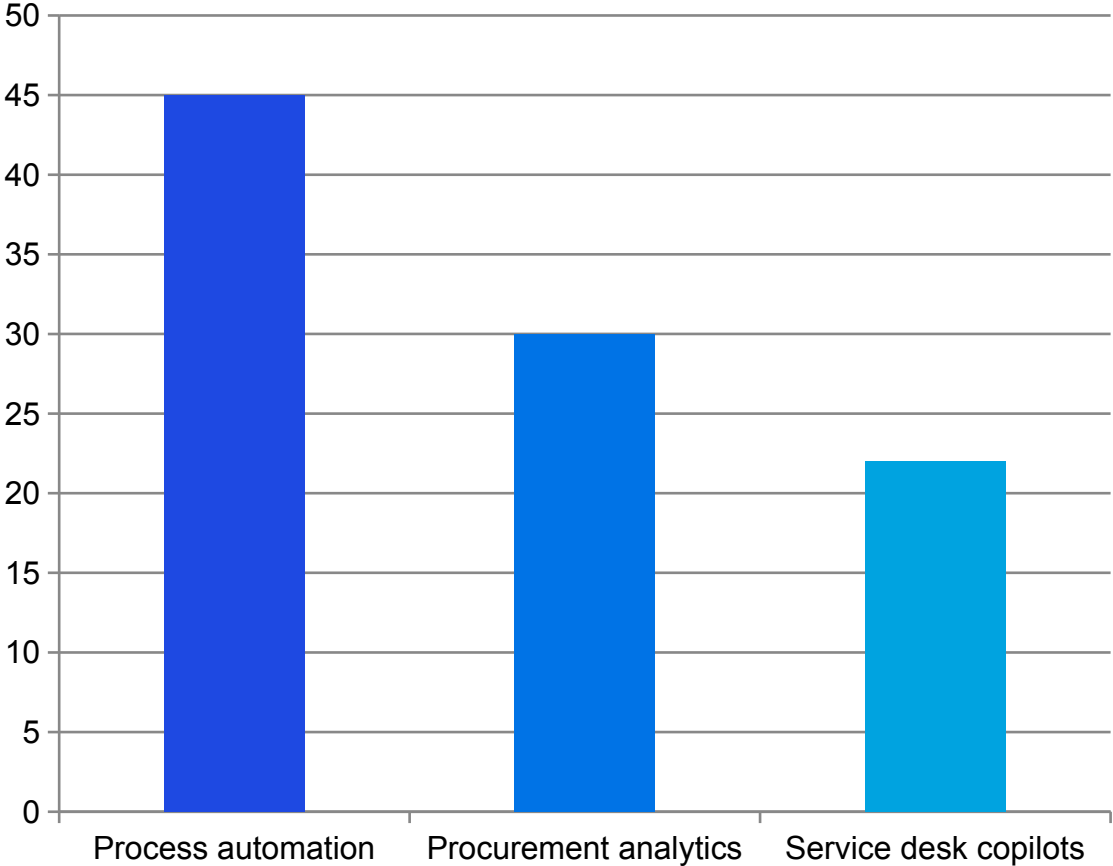

Agenda

Current-state cost baseline

- Current-state cost baseline
- Value pool opportunities
- Delivery roadmap
- Risks and mitigations

Value Pool Sizing

- Process automation: 45
- Procurement analytics: 30

Delivery Options (Build vs Partner)

Build: higher control, slower time-to-value, heavier talent burden

- Build: higher control, slower time-to-value, heavier talent burden
- Partner: faster deployment, stronger accelerators, some vendor dependency

- Hybrid model balances speed and control in phase 1

90-Day Mobilization Workflow

Step 1: Confirm baseline and scope

Step 1: Confirm baseline and scope

Step 2: Prioritize 3 lighthouse use cases

Step 3: Stand up data and governance controls

Step 4: Launch pilots and track value weekly

Benchmark Snapshot

Metric	Current	Target
SG&A ratio	18.4%	16.9%
Automation coverage	12%	38%
Cycle time (days)	21	13

Recommendation

Approve a 12-month AI cost program anchored on 3 value pools

- Approve a 12-month AI cost program anchored on 3 value pools
- Fund central enablement once and scale through business waves
- Track value with monthly CFO governance and KPI owners

Key Risks and Mitigations

Risk: weak data quality; Mitigation: data triage sprint in month 1

- Risk: weak data quality; Mitigation: data triage sprint in month 1
- Risk: change resistance; Mitigation: role-based enablement and champions

- Risk: unclear value ownership; Mitigation: KPI owners and PMO cadence
